Welfare expenditures for the month of May amounted to \$144.97 for cases with a Bethel settlement. Three cases required medical assistance to the amount of \$24.97. One case requiring convalescent home care cost \$120.00. This amount will be reduced in the future as a grant of Old Age Assistance has been made to this case.

Bushes have always been a problem along the highways. This week two tractor mowers are at work mowing the roadsides. This has a twofold purpose, as it keeps the bushes down as well as having a tendency to improve the appearance of the roadside.

Sincerely,
Harold L. Bean

Chevy's come up with the newest, sweetest, smoothest automatic drive—Turboglide. It's the first and only triple-turbine transmission!

Moves out in
a single sweep
of motion

... Chevrolet with Turboglide!

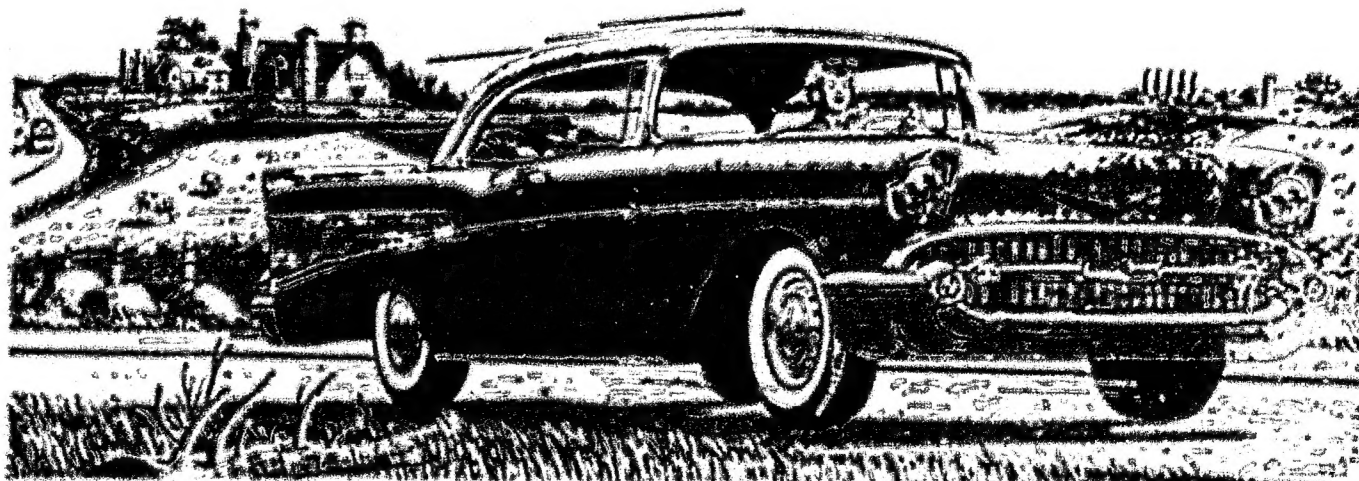

Turboglide is something really new and different in automatic drives. In the first place, there's only one forward-speed position on the control panel. There's no "Low" needed.

Turboglide handles everything with the oil-smooth action of triple turbines. You travel from a standstill to top cruising speeds with never a lurch or lag to mar your motion.

When you see a steep downhill stretch ahead, you set the selector at "Gr" (Grade retarder) and Turboglide helps slow you down. Try Chevy's new, nothing-like-it automatic drive. It's optional at extra cost—and worth it.

From the Vista Press, Vista California: Even the youth in the high schools today are discussing the huge Eisenhower budget in connection with the curtailment in the postoffice department.

Congressional investigations of the foreign aid program show evidence of extravagance, waste and loss of prestige for the United States, and in the face of these investigations no effort has been made to slow down the aid program nor to ease the tax burden on us, the people.

At the time of inception of the foreign assistance plan it was thought that the idea was good, and the people went along with the program. But now that it seems there is to be no end.

Were the funds administered carefully, together with a more conservative spending on our internal and military expenditures, there is no doubt but that our tax burden would be lightened. But our government does not seem to care to work in this manner. It seems that there are too many pockets playing at being financial wizards.

The foreign aid program was presumably established in an effort to sustain the growth of Communism, yet statistics show that the Communists working quietly underground in the United States are

continually engaged in propaganda and securing converts, according to the annual report of the House Committee on Un-American Activities.

The report states: "The United States remains the major target of Soviet aggression; indifference to the Kremlin's avowed program of global conquest can lead only to the inevitable destruction of our free institutions, and ourselves as a free nation."

We are Americans; we only know and believe in the government of the United States of America, but through the heavy tax load imposed upon us, we are beginning to lose confidence in our leaders, leaders who through heavy taxation have taken away the right of small business to grow, and to those who are sending billions out of our country only to earn the contempt of the recipients, due to the careless method of administration.

It is only human to look for a way out of problems. It is within reason to believe that we, as citizens of these United States of America, might, because of continued unwarranted tax, become fertile ground for the seeds of Communism.

Happenings That Affect the Future of Every Individual — National and International Problems Inseparable from Local Welfare.

A number of proposals for placing ceilings on individual and corporate income tax rates have been made in late years. Some of these are phrased in very general terms and say only that the maximum rate shall be 25 per cent, 30 per cent, or some other percentage. Others are highly detailed, and offer complete plans for the relief of taxpayers.

An unusually interesting example of the latter is found in an actual bill which has been introduced by Representative Antoni Sadiak of Connecticut, a member of the powerful House Ways and Means Committee which writes the tax laws. Mr. Sadiak, to use his own words, is "convinced that achievement of a moderate schedule of income tax rates is necessary to the continued vitality and growth of our nation's economy, and to the maximum advances in the standard of living of all our citizens." His bill would bring about major reform in the income tax structure and perhaps of even greater moment, it would compel the big federal spending programs to complete against regularly scheduled income tax reductions.

The bill would project the reduction of each income tax bracket over a five year period. It would be in effect in the discretion of the President and Congress, for post-ponement of not more than a year at a time should an unbalanced budget and deficit financing threaten. Thus the rate reductions could be spread over five years.

On the taxpayer's side every financial head would be beating the drum for a rate which applies to the first \$1000 of net income to be reduced from 30 per cent to 25 per cent. When gradual reductions would be made to the progressive rates so that at the end of the period the peak rate would be 25 per cent as against the present 91 per cent.

There are some specific examples of such reductions in the \$10,000 bracket which would drop from 63 to 50 per cent in the \$10,000 bracket from 54 to 45 per cent in the \$20,000 to the \$30,000 bracket from 45 to 35 per cent in the \$40,000 to the \$50,000 bracket from 35 to 25 per cent in the \$60,000 to the \$70,000 bracket from 25 to 15 per cent in the \$80,000 to the \$90,000 bracket Phil Shaw, Magician

Phil Shaw, Bangor magician will appear on the "Magic Review" show to be presented by the Maine Magicians Society at Bethel, June 23.

Born in Brewer, Maine, he has performed throughout the state, and when in the U S Army did camp shows in various parts of the country as well as Europe.

During this time he developed an act called "Streamlined Sorcery." A

fast, flashy, slight of hand performance which embraces superb magic, effortless skill and subtle touches of comedy. Playing cards and cigarettes appear from nowhere and perform the impossible.

Mr. Shaw recently won a first place award for the best slight of hand in New England. Don't fail to see him and the other star attractions at the Big "Magic Review" Show.

New Homes Guide Plan With Oriental Influence

Architect Gertrude A. Weber might have had a Japanese teacher to mind when he designed this house, featured in NEW HOMES magazine. But a good plan is a good plan, regardless of the teacher that gave it flavor. As a matter of fact, in some sections of the country these unusual doors and windows might be very expensive, with an exceptionally well executed interior arrangement and a two-way fireplace that extends out to provide a terrace for the terrace. Eastern charm of the home can be increased by using bubble light fixtures, oriental wallpaper and the like. Area is 1,641 sq. ft. Regarding blueprints, write NEW HOMES GUIDE, Dept. 1904, 821 N. Dearborn, Chicago 10, Ill.

NO IMMEDIATE RISE IN EGG PRICES EXPECTED

Latest predictions are that there'll be no real strength in the egg market before late summer. By late August or September egg prices are likely to rise to a level at least equal to those of last year. This upward trend is likely to continue through the turn of the year. That's the word from a poultry survey committee of the American Feed Manufacturers Association.

JUNE IS DAIRY MONTH IN MAINE

June Dairy Month is now being observed in Maine and the nation. Maine dairymen and the entire dairy industry, in cooperation with various interested organizations, are cooperating. The dairy industry in the United States began 260 years ago with the founding of the Jamestown Colony in Virginia. Dairy products of high quality are now readily available to all Maine people. Milk, ice cream, cheese, butter—they all contain the highest food values and are good buys for the money.

Preliminary surveys were made for the construction of a 750 foot tile drain and a 600 foot waterway on the Ernest and Norman Lovejoy farm in Buckfield.

A survey was completed for a 3-acre land grading project on the William Chapman Farm in Bethel.
